VERSION 13 top new features

ADD FALSE DORMER Save time with the 'Add False Dormer' feature, which will automate the placement of a dormer. Simply select the wall type and window then the dormer is automatically constructed

Auto Cabinet will allow all of the cabinets in a run to be placed by simply tracing the location with a single line in the plan. The upper and lower cabinets can be added at the same time with the selected

BACKGROUND EXTRACTION OF SOFTVIEW MODELS This new System Option will allow SoftView to automatically update the 3D model while you are making changes to your plan in SoftPlan. The end result will be an almost instantaneous appearance of 3D, Elevations, Sections, and Roof Profiles.

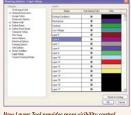

Easily print your entire job at once with Batch Print

BATCH PRINT Batch Print will allow you to easily print your entire job at once. While the drawings are printing, your work can continue

CUSTOMIZE FLOATING TOOLBAR The floating toolbar in Version 13 was designed keeping the user in mind, as the content of the floating toolbar is user definable. A command can be easily added or removed from the toolbar in each of SoftPlan's modes

LATHE Use the Lathe Template to create custom shapes for the stair's Posts, Newels, and Spindles. The Lathe allows you to "convert" custom profiles out of square stock that will be used on the 3D model and the generated working drawings.

New Layers Tool provides more visibility control

LAYERS To give you more visibility control, you can use Layers. Layers can be used to group a series of items that you want to associate together, such as a series of walls, openings, and dimensions.

Multi Drawing Includes Multiple Instances of the Same Drawing The Multi Drawing feature can be used to add the same drawing file several times to the same multi drawing, while displaying each instance of the drawing in a different mode.

BUILDING OPTIONS This advanced feature of SoftPlan allows you to manage variations

in a building plan. Using the Building Options feature, you can start with a basic

CUSTOM ROOF PROFILE Create curved and barreled roofs like those used on French

floor plan and then quickly add various structural options.

Country influenced designs. The user creates these custom profiles.

SOFT VIEW REAL TIME FLY THROUGH Enhance visual presentations and dazzle customers with the 'Soft View Real Time Fly Through' feature. In SoftView, the camera and focus point can be moved using the mouse. which allows the user to fly through the textured SoftView model in real time.

ROOM MODE ROOM mode will keep information specific to room finishes in a separate mode. Room polygons can be added to automatically place interior details such as flooring, wallcovering, baseboards, bulkhead, and crown molding.

SINGLE KEY KEYBOARD SHORTCUTS SoftPlan comes with a series of predefined keyboard shortcuts to quickly access some commonly used commands. These keyboard shortcuts can be modified or you can create your own keyboard shortcut for any number of existing SoftPlan

SUN STUDIES Three different types of Sun Studies can be created: Static, Full Day Study, and Full Year Study, In SoftView a sun study generates an animation file that will display the effects of the sun on a design over the course of a full day or a full year.

SOFTPLAN INTERACTIVE TRAINING CDS

While SoftPlan is the easiest, most powerful, architectural design software available, we know that some of our users value the added convenience of specialized training. Consequently, the SoftPlan Interactive Training CDs were designed by our very own training staff for those users who want to use SoftPlan to its full potential. These CDs are a complete hands on training tool. Concepts can be clearly understood through step-by-step explanations. An added bonus is that the CDs are a great supplement to the Learning SoftPlan training manual and make an excellent reference tool. The CDs are available in the Introductory and Intermediate levels. To order visit www.softplan.com.

SOFTPLAN REVIEW

SoftPlan reView allows instant access to a SoftPlan drawing to view, comment, and

mark-up the drawing by email on a [PC or Pocket PC. reView facilitates communication throughout the entire building process, as all of the architectural information will be available in a reView file for your clients, field personnel, trade

contractors, engineers, and print shops. Communicate your design ideas to the client while providing your client access to redline a drawing. Also conveniently view a reView file on site using a Pocket PC. Record punch items, then load those mark-ups or comments directly back into the SoftPlan drawing, reView can be ordered on www.softplan.com.

SOFTPLAN HOME PLANS WEBSITE

SoftPlan's online database of home plans presents an exclusive compilation of house plans that will suit a wide assortment of styles and needs. The collection features plans that can be found in national publications by some of the nation's top residential designers, providing only the highest of quality. All home plans are available in the SoftPlan format and are delivered right to you on CD. Go online to www.SoftPlanhomeplans.com to browse through our selection of home plans for your next project.

SOFTPLAN USERS FORUM

The SoftPlan users forum is a FREE service available to all registered users who are in good standing with SoftPlan. This forum is provided as a communication channel between SoftPlan users. Here users are able to share knowledge and to discuss technical as pects of the program, as well as general construction techniques. The users forum showcases a gallery of SoftPlan 3D renderingsand allows access to SoftPlan downloads. Browse through the classified section or learn some "tips and tricks" of the program.
